Gee! Sorry for the delay but I simply have to save up enough for the postage stamps.

Anyway - Trust Dave Marshall - where else would you think could he ever set a 'decent' run except for his work site, AND what a sight! Finding your way to the joint was like putting your automobile on a hash run. Before the run we were all entertained by a circus of fighter jets. Not bad eh! Keep it up Dave - very much appreciated.

The run started off with a false alarm check - but I guess Dave & Mary were doing away with pigs - now they go for chickens! Run was pretty good except the fowl air was quite a bit of a problem. Whoever set it must be quite used to the beautiful aroma. Plenty of single file running and walking, meeting and talking to new faces (which do all the time). There seemed to be lots of in and out of ditches and bushes. Don't you guys begin to wonder how Dave ever spotted this site!!? Search me!

Through kampong, underbrush, overbrush, monsoon drain and not forgetting squeezing ourselves between many banana trees. The run was pretty good. The pack was well glued except when we almost reach the end! This may sound weird - can you imagine - how could we miss those HHH beautiful sexy shorts. Boy! was it black and sleazy. Hard to explain but all the hashers had to take one size bigger. Now Mary please leave room for those thighs.

Anyway, congratulations for the rather enjoyable run.

I'm sorry I can't say much about the ON ON as I was busy finding my way home. How was it Hashers??
